SPACE ACADEMY

THE UNIVERSITY OF THE PLANETS!

Located in the United States of America, a member nation of the Commonwealth of Earth, this is the most exciting school of the world of the future. On Earth, on Mars, on Venus—there was no prouder title than that of Space Academy Cadet!

Applicants to Space Academy come from every corner of the Earth, from the deserts of Mars, from the jungles of Venus, from the leafy colonies in space.

But before a boy could be admitted to Space Academy, he had to pass some of the hardest tests ever invented: in character and intelligence, in knowledge of all the sciences and history, in physical stamina to withstand the rigors of space travel!

Only the finest are chosen to become Space Cadets... and begin the intensive training for future duty as Solar Guards!

MARS

This photograph of Mars shows how closely it resembles earth. The north polar ice cap is exactly the same as the ice cap surrounding the North Pole on earth and there is, quite probably, a torrid zone just like ours on the middle belt of the planet, closest to the sun. When seen in the night sky, it is very easy to identify because of its red, reflected light,
